SUMMARY

Full-stack developer building web applications that are as solid under the hood as they are smooth to use. I care about clean architecture, thoughtful API design, and shipping things that actually work well - not just look like they do. I enjoy collaborating in team environments and take ownership of both the code and the product.

WORK EXPERIENCE

Full Stack Web Developer • Biodata • 2020-2022

- Optimized frontend and backend performance, identifying bottlenecks and significantly improving application load times and responsiveness.
- Authored and maintained comprehensive documentation for APIs, component architecture, and development workflows across the full project lifecycle.
- Led code reviews, enforcing best practices for modular, maintainable code.
- Expanded unit and integration test coverage, consistently promoting test-driven development for new features and existing functionality.
- Contributed to architectural planning, evaluating potential solutions by performance, complexity, maintainability, and delivery constraints.
- Investigated and resolved production issues by analyzing logs, reproducing defects, and implementing timely fixes.

EDUCATION

Coding Academy • Full Stack Developer • 2025-2025

An intensive 14-week bootcamp for experienced programmers, covering modern frontend and backend technologies through a project-based curriculum culminating in a full-stack application.

WeCode • Academic Coding Bootcamp • 2019-2020

A professional and academic training program for Full Stack Developers - Reichman University (IDC) and Experis Software R&D Ltd.

PROJECTS

Kanbox • React, Redux, Node.js, Express, MongoDB

A full-stack Kanban application inspired by Trello, featuring real-time board management, drag-and-drop card positioning, and a RESTful API backend.

SKILLS

Programming Languages: JavaScript, TypeScript, Ruby, Python

Frontend: HTML, CSS, React, Next.js, Astro, Redux, Bootstrap, Material UI

Backend: Node.js, Express, Ruby on Rails, Flask

Databases: MongoDB, MySQL, Redis

DevOps & Tools: Git, GitHub, GitLab, Docker, Podman, AWS, Jenkins, Postman

Languages: Hebrew (Native), English (Working Proficiency), Russian (Basic)
